PDF	variant pdf/a-2b; font DejaVu Sans 2.37

Namespaces are known only from observed bindings (rbac.namespaces is off). 'No grants observed' cannot be told from 'namespace never observed', so absence of access is NOT attested.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-08-07T23:47:59Z (last read 2026-09-14T11:11:06Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

Privileged grants

Privileged here means: a binding to cluster-admin, admin, edit — cluster-admin at any scope, the others at cluster scope. Namespaced admin/edit grants are in the access matrix and the namespace report.

Direct user grants

role	scope	user	binding
edit	(cluster-scoped)	jdoe	jdoe-cluster-edit

A direct privileged grant is the highest-severity finding this dashboard knows: tied to a person, not to a reviewed group.
