Namespaces are known only from observed bindings (rbac.namespaces is off). 'No grants observed' cannot be told from 'namespace never observed', so absence of access is NOT attested.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-08-07T23:47:59Z (last read 2026-09-14T11:11:06Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

Summary

Counts

Members who have never logged in	3
Members with access but outside the login gate	3
Gate members with no other access	1
Login gate	app-ssb-autobahnusers (oauth)

Never logged in

Synced members with no login

member	groups	first seen	why
bob.wilson	26	2026-08-02T04:00:33Z	no User object
charlie.brown	6	2026-08-02T04:00:33Z	no User object
hello1	1	2026-08-03T20:55:37Z	no User object

Access held through a directory group by an account that has never authenticated here. Offboarding candidates, or people who never needed the access.

The login gate

Access without login (outside the gate)

member	groups	group names	first seen	has tried to log in

Login without access (gate members holding nothing else)

member	first seen	has tried to log in
ocp-oauth-bind-serviceid	2026-08-08T02:51:14Z	no

Dormant: no successful login in 90 days

Members who have logged in before, not recently

member	last successful login
ocp-oauth-bind-serviceid	no success recorded since capture began

Only as good as capture's coverage: attempts recorded since 2026-08-07T23:47:59Z. A member whose last login predates capture shows 'no success recorded'.
