

RBAC binding findings

cluster dashboard · generated 2026-10-04T13:02:48Z by developer (proxy-verified, ticket from the dashboard)

sha256 of the report data: e987493433bb99eb1bc048479879aa3ecc0ebac5a44acabd46ec1a6832de848a

Provenance and coverage

Provenance

Handling	Handling: internal — access review evidence
Cluster	dashboard — https://kubernetes.default.svc
Generated at (UTC)	2026-10-04T13:02:48Z
Generated by	developer (proxy-verified, ticket from the dashboard)
Run id	20261004T130248.890582Z-9f42
Report service	5.0.0 @ 704943a11c
Data as of	snapshot 2026-10-04T13:02:32.288693Z (taken 0 min before generation; bindings refresh every 3600 s); schema 20
Last poll	2026-10-04T13:02:31Z — ok
Namespaces	every namespace on the cluster was read — a namespace with no grants is reported as having none
User objects	read — 'logged in' means a User object with an identity exists
Login capture	on — attempts are recorded; see the note for since when
History retained since	membership_event: 2026-09-21T06:15:27Z, sync_event: 2026-09-21T06:15:27Z, login_event: 2026-09-21T06:15:28Z
Includes membership rosters	no
Parameters	none
PDF	variant pdf/a-2b; font DejaVu Sans 2.37

Every namespace on the cluster was read, so a requested namespace that does not exist is reported as such, and a namespace with no observed binding is reported as having no grants.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-09-21T06:15:28Z (last read 2026-10-04T13:02:31Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

Summary

Bindings by tier

dangling	0
unresolved	6
unmanaged	58
ok	43

Definitions (the dashboard's, gsd/store.py Store._FINDING_CASE)

tier	meaning
dangling	the group was observed operator-managed and is now absent — something broke; the binding grants nobody
unresolved	the group has never been seen managed and does not exist — the binding names something that never existed

tier	meaning
unmanaged	a grant no policy operator manages, with no exception annotation — a synced group, a ServiceAccount or a user granted by hand; governance bypassed
ok	resolves normally, or carries the policy system's label

Dangling bindings

dangling

no dangling bindings

Unresolved bindings

unresolved

subject	scope	role	binding	kind	source	exception
