Every namespace on the cluster was read, so a requested namespace that does not exist is reported as such, and a namespace with no observed binding is reported as having no grants.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-09-21T06:15:28Z (last read 2026-09-30T09:43:53Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

gsd · Namespace: group-sync-dashboard**Namespace**

Name	group-sync-dashboard
Status	exists on the cluster
Observed on a binding	no
