Every namespace on the cluster was read, so a requested namespace that does not exist is reported as such, and a namespace with no observed binding is reported as having no grants.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-09-21T06:15:28Z (last read 2026-10-03T20:06:41Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

Summary

Counts

Members who have never logged in	4
Members with access but outside the login gate	2
Gate members with no other access	2
Login gate	app-ssb-autobahnusers (oauth)

Never logged in

Synced members with no login

member	groups	first seen	why
bob.wilson	27	2026-09-21T06:15:27Z	no User object
charlie.brown	6	2026-09-21T06:15:27Z	no User object
shop.alice	1	2026-09-27T04:00:33Z	no User object
shop.bob	2	2026-09-27T03:50:33Z	no User object

Access held through a directory group by an account that has never authenticated here. Offboarding candidates, or people who never needed the access.

The login gate

Access without login (outside the gate)

Login without access (gate members holding nothing else)

member	first seen	has tried to log in
ocp-oauth-bind-serviceid	2026-09-21T06:15:27Z	no
shop.alice	2026-09-27T04:00:33Z	no

Dormant: no successful login in 90 days

Members who have logged in before, not recently

member	last successful login
ocp-oauth-bind-serviceid	no success recorded since capture began

Only as good as capture's coverage: attempts recorded since 2026-09-21T06:15:28Z. A member whose last login predates capture shows 'no success recorded'.
