Namespaces are known only from observed bindings (rbac.namespaces is off). 'No grants observed' cannot be told from 'namespace never observed', so absence of access is NOT attested.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-08-07T23:47:59Z (last read 2026-09-14T11:11:06Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

Groups needing attention

Empty groups

group	provider
test-group2	unattributed

A group that grants nobody: either the directory group emptied, or the LDAP filter no longer matches it.

Unattributed groups

group	members
test-group1	1
test-group2	0

No GroupSync CR claims this group; it is not governed by the directory.

Observed by the dashboard's poll, so a change is dated at the poll that saw it, not at the directory's edit; the history covers only the period since the dashboard began observing (2026-08-02T04:00:33Z).
