Every namespace on the cluster was read, so a requested namespace that does not exist is reported as such, and a namespace with no observed binding is reported as having no grants.

User objects were read; 'logged in' means a User with an identity exists.

Login attempts are recorded since 2026-09-21T06:15:28Z (last read 2026-10-03T20:06:41Z); nothing before that was ever observed.

Scope: direct bindings only; role rules are not evaluated — this is not an effective-permissions calculation.

Observed by the dashboard's poll, so a change is dated at the poll that saw it, not at the directory's edit; the history covers only the period since the dashboard began observing (2026-09-21T06:15:27Z).
